

## A PRESCHOOLER'S GUIDE TO MAKE ROCKING WEB CONTENT

Determine target audience

Let everyone understand

Get visually attractive

Forget the maze

Structure is important

Small Calls-to-Actions matter

Good websites are generally replete with relevant content, images and charts

Calls-to-action like "Buy Now", "Call Now". "Get a Quote" are very helpful in generating interest among the readers

Webpages must be easy to read. Use shorter paragraphs and plenty of numbers & charts

Segment your website page into proper structure. Include About Us, Home, Product Description, Contact Us, Feedback etc.

There is no room for jargon here. Keep in mind people spend very less time on a webpage
